

It's Only Getting Better

The wind blows
We have walked these woods so many times
I know we'll never walk here again
Another girl
She's the one who's walking with you now
Were you waiting for her all along?

I should have seen it coming but I was blinded by love,
And my heart just didn't want to let you go

Chorus:

I was lonely, I was stranded, I was lost, and I was broken

**But now I'm stronger, I'm moving on, I'm climbing,
and IT'S ONLY GETTING BETTER**

I look up
The two of you are heading for the woods
I need to find another way home
My path is gone
I can never go that way again
But who will show me now that I'm alone

I didn't realize how cold it was until you let go of my hand
But now it's time I reached for someone else

Chorus

I turn around, there's a friend who is always there for me
He gave me a shoulder now I see
He takes my hand
I can't believe he's been here all the time
I just never looked into his eyes

Well they say that something good comes out of everything
And now I know that they just might be right

Chorus

Keira Moran
