

# Leave this City

Livin your life on the open road  
There's not a place that you call home  
Waiting for enlightenment that never came

Chasing danger where you go  
Leaving lovers as you roam  
Share the night and then forget their name

The lights were low and the music was loud  
When you picked me up out of the crowd  
I told you I don't do one night stands  
But you looked me in the eye and took my hand

**Chorus:**

**You're a rolling stone  
but you stopped rolling for me  
I make you feel so alive  
So you never wanna leave this city  
I see that you can't keep your hands off me  
I can make you want me  
So you never wanna leave this city**

Stayed up all night till we saw the sun  
But our time together had just begun  
You said you'd never felt like this before

You fell for me so easily  
You needed me so desperately  
And I kept you from walking out the door

**(Chorus)**

I got your heart on a string  
You give me your everything  
I got the magic you crave  
Give me your love everyday  
But here deep in my mind  
I know I can't deny  
You got me hypnotized  
I need you here tonight

Don't leave me don't leave this city  
Don't leave me don't leave this city  
Don't leave me don't leave this city  
Don't Don't Don't

**You're a rolling stone  
but now my life's complete  
You make me feel so alive  
So please never ever leave  
When you pull me in  
I feel like I can't breathe  
Tell me, baby, what to do  
So you'll never wanna leave this city**

Don't leave me don't leave this city  
Don't leave me don't leave this city  
Don't leave me don't leave this city  
Don't Don't Don't

**Keira Moran**
