

All the Right Things

We got history- don't deny it
You know you and me – we gave it a try, we gave it a try
We made sunny days last forever
Didn't mind the rain – we're loving inside, takin our time

But something drove us apart
Hard to remember why
When you call, speaking your heart
I won't lie

**You say all the right things
All the right words take my guard down
You say all the right things
I'm already gone but I turn around**

**I thought I was strong
Thought I moved on
Thought I was done with you**

**But you say all the right things
Maybe we're not through
Maybe we're not through
'Cause you say all the right things**

Yeah we had our fights – won't deny it
Screaming through the walls till the end of the night, end of the night
But we always made up to each other
Always went to sleep with you in my mind, you in my mind

But something drove us apart
Hard to remember why
When you call, speaking your heart
I won't lie

**You say all the right things
All the right words take my guard down
You say all the right things
I'm already gone but I turn around**

**I thought I was strong
Thought I moved on
Thought I was done with you**

**But you say all the right things
Maybe we're not through
Maybe we're not through
'Cause you say all the right things**

**Don't wanna back track
'Cause we've been down this road
Maybe some distance
Will do us some good
Don't wanna forget
The highs and the lows
Something's pulling me right back to you**

**When you say all the right things
All the right words take my guard down
You say all the right things
I'm already gone but I turn around**

**All the right things
You say all the right things**

**You say all the right things
All the right words take my guard down
You say all the right things
I'm already gone but I turn around**

**I thought I was strong
Thought I moved on
Thought I was done with you**

**But you say all the right things
Maybe we're not through
Maybe we're not through
'Cause you say all the right things**
